## Tap holes

Victoria & Albert baths come undrilled ready for use with the Lido and Lido Grande tap stands. Depending on the design of the rim, some baths may be drilled for bath-mounted tapware.

May be drilled by installer

Cannot be drilled

## Feet

Made using materials of the highest quality and hand finished by craftsmen, at Victoria & Albert we are very proud of our bath feet.

**Feet are not interchangeable between bath models - each foot is developed to fit a specific bathing well.**

- All white QUARRYCAST® feet can be painted for home personalisation.
- All metal feet are height adjustable.

<sup>1</sup> The low seating of the Napoli and Marlborough baths requires the waste fitting to be fitted below floor level.

<sup>2</sup> Caution: The weight of the Sorrento filled with water may exceed 500kg. Please ensure that all flooring is specified for such loads and reinforce where necessary.
